

# INTERN OPPORTUNITY

The Community Technology Project  
205 Amesbury Avenue, London, SW2 3BJ  
0208 6715555 / 0207 7333334  
<http://comm-tech.org/>

## About us

Community Technology supports organisations in the Charitable and Voluntary sector by the provision of Technical Support, Equipment maintenance and by supporting Open Source Software.

A non-profit organisation with a strong ethical basis to its work, Community Technology also promotes the re-use and recycling of equipment and endeavours to minimise the environmental impact of IT waste.

In Addition to the above operations, Community Technology is also active in the Linux community and actively seeks to further develop OSS to enhance the ICT abilities of non-profits and NGOs.

## About you

- You would have excellent computer skills, maybe even paper qualifications, although these are not as important as ability.
- You will have a clear phone manner and good written English.
- You are able to solve the majority of everyday IT problems and you have an keen interest in open source development.
- Above all you will need a desire to learn and be self-motivated in your learning.
- You are aware of the growing technological divide and subscribe to the ethical aims of Community Technology stated above.
- You have 2 to 5 days per week spare and are able to commit at least 6 months to working with us.

## The Benefits

This is a voluntary opportunity that will give successful applicants hands on work experience of servicing a client centred environment dealing with a wide variety of tasks and issues.

## What Next

If you are interested in joining Community Technology then please contact us and ask for an application pack. (Contact details above.)

NOTE: Comm-tech is not a school or college, we are not able to assist with work permits, visa applications, accommodation or travel expenses from ex-London.
